to Quality
Brick Siding

NOVABRIK
YOUR HOME!®

New 4" size! Save an additional 25% on Installation

New residential construction

A mix of colors can be used to create a design.

The Brick Without Mortar

Novabrik is an innovative Mortarless Brick Siding. It provides exceptional versatility, and design flexibility. This unique veneer system was created after more than 5 years of research and development. Novabrik is manufactured by regional producers, under license in the USA, Canada and throughout the world.

Protect Your Investment

Novabrik increases the wall rigidity of conventional wood-frame houses by an average of 35%. It can easily withstand the effects of strong earthquakes. Its rain-screen design prevents water from penetrating the wall from the outside and the mortarless construction promotes air flow in the wall cavity, thus removing any moisture coming from the inside. The water-absorption of the high strength concrete composition is less than 5%, ensuring exceptional resistance to freeze-thaw cycles.

Residential remodeling

Commercial building with corporate colours

Novabrik requires no brick ledge and can be easily installed on various types of structures and in all weather conditions.

For more information call your local Novabrik distributor or visit our website.

New commercial construction

Post-Frame building, with Wainscot Cap

New residential construction

Installing Novabrik is quick and easy!

Complete the prep work...

Install the corner blocks...

Fasten the bricks.

Harvest Blend
265-125

We endeavor to manufacture our products in even colors, shades, and textures, but variances may still occur in daily manufacture.

To obtain an even distribution of color and texture, it is recommended that product from a number of pallets be blended together during the installation process.

Due to printing process, actual colours may not be exactly as shown. Please check the Novabrik samples. *available through Special Order only
